1   Automatic metadata creation: Bibliographic attribute extraction from erroneous references based on a statistical model
Atsuhiro Takasu
May 2003 **Proceedings of the 3rd ACM/IEEE-CS joint conference on Digital libraries**
Publisher: IEEE Computer Society

Full text available: 📄 pdf(345.42 KB)   Additional Information: full citation, abstract, references, citings, index terms

In this paper, we propose a method for extracting bibliographic attributes from reference strings captured using Optical Character Recognition (OCR) and an extended hidden Markov model. Bibliographic attribute extraction can be used in two ways. One is reference parsing in which attribute values are extracted from OCR-processed references for bibliographic matching. The other is reference alignment in which attribute values are aligned to the bibliographic record to enrich the vocabulary of the ...

2   World Wide Web courseware
Ka-Wing Wong
July 1997 **ACM SIGICE Bulletin**, Volume 23 Issue 1
Publisher: ACM Press

Full text available: 📄 pdf(733.96 KB)   Additional Information: full citation, abstract, references

There is an increasing demand for online courses. The so called, <i>virtual university</i>, shows how big the general public's demand for online distant education is. With rapid advance in the development of the Internet, especially the World Wide Web, online courses taught on the World Wide Web are becoming popular. The World Wide Web courseware, which supports advances in online distant education, is going to be a major component in the development of individual computing environmen ...
